PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

The Khabarovsk Supply Depot is located in the center of Khabarovsk, immediately north of a possible military barracks area which has been under construction since the summer [REDACTED] (Figure 1).

The installation encompasses approximately 150 acres and contains a total of 49 buildings, including 1 possible barracks/administration building and 48 storage buildings. Numerous vehicles which appear to be trucks are parked throughout the area (Figures 2 and 3).

The function of this depot cannot be deter-

mined from photography. The proximity of urban housing and the absence of a firebreak and double security fencing tends to rule out large quantities of munitions. The pattern of dispersal of the buildings and the lack of identifiable maintenance facilities tend to rule out vehicle storage.

Comparative analysis based on [REDACTED] and [REDACTED] missions indicates that the depot has undergone no apparent change between [REDACTED]

DESCRIPTION OF INSTALLATION

Road Service

The installation is served by city streets.

Administrative and Troop Housing Area

Area D contains 1 possible barracks/administration building. Additional billeting appears to be provided within the surrounding urban complex; however, the extent of this billeting cannot be determined from present coverage. A large possible military barracks area is under construction immediately south of the

depot. However, as the depot predates this billeting on all available photography, it appears that these two facilities are not associated.

General Storage Area

Area E is fenced and contains 48 dispersed storage buildings. Although dispersed they are not bunkered, nor is there evidence of a firebreak. Numerous vehicles which appear to be trucks are parked within the area.
